Summary

Adejare Taiwo is a passionate young Software Developer (Backend) with proficient knowledge and experience from my previous challenges, HNG internship(3-month intense software development training) as one of the finalists and hands-on experience using Backend language(Nodejs[Express and XpresserJs], PHP(Laravel) to create and implement software applications. My dream is to be part of the team to learn and build the next big software that will help the tech world at large.
